

CerAzul

Practical workshop on tile restoration techniques

Practical demonstrations of techniques and materials used in restoration of azulejos (glazed ceramic tiles) in particular those studied within the CerAzul project.

CerAzul is a research project funded by FCT (PTDC/CTM-CER/119085/2010) on the appraisal and development of materials and techniques for the restoration of azulejos.

Whenever possible the materials and samples used during the project will be displayed in the workshop, and the techniques demonstrated.

Program (to be confirmed)

15:00 – 16:30

Consolidation of the azulejo ceramic matrix
Adhesion of azulejo fragments
Lacunae filling and chromatic reintegration

16:30 – 17:00

Glazing and painting of azulejos

Participants can paint their own azulejos (at a cost of €3,00 per blank tile) fire it and take it on the last day of the GlazeArch2015 conference. Participation is free of charge but attendance is limited to the capacity of the room. Please register to spereira@lnec.pt
